

Job Application Tracker — Wireframes

Low-fidelity sketches · CSE 499 Sprint 1 · Ovinson Lugo & Patrick Armani

1 / 11

Screen	Route (suggested)	Page	Build in
Dashboard	GET /	2	Sprint 2
Applications list (Index)	GET /JobApplications	3, 8, 9	SPRINT 1
Add application (Create)	GET+POST /JobApplications/Create	4, 8, 9	SPRINT 1
Details	GET /JobApplications/Details/{id}	5	Sprint 2
Edit	GET+POST /JobApplications/Edit/{id}	6	Sprint 2
Delete (confirmation)	GET+POST /JobApplications/Delete/{id}	7	Sprint 2
Login / Register	/Identity/Account/...	10	Later

Page 11 is the visual guide (colors, type, buttons, fields, status badges). Build order is a suggestion for the team to confirm; Sprint 1 in the assignment record covers Index and Create.

Company	Position	Applied	Status
Northwind Health	Junior .NET Developer	Sep 12, 2026	Interview
Brightside Logistics	Software Engineer I	Sep 8, 2026	Applied
Cobalt Labs	Backend Intern	Sep 17, 2026	Applied
Harbor Analytics	Associate Data Engineer	Sep 20, 2026	Applied

NOTES

- 1 Total number of saved applications.
- 2 Main action is always the top-right button: goes to Create.
- 3 One card per status. Each shows its count and links to the list filtered by that status.
- 4 The last 4 applications, newest first.
- 5 "View all" opens the full Applications list.

Data: one query that counts applications grouped by Status. No charts needed.

Tidewater Bank	Application Developer	Aug 27, 2026	Rejected	View Edit Delete
Harbor Analytics	Associate Data Engineer	Sep 20, 2026	Applied	View Edit Delete

Showing 6 of 10 applications

- NOTES
- 1

"Add application" opens the Create form.
- 2

Search matches company name or position.
- 3

Status filter: All, Applied, Interview, Offer, Rejected.
- 4

One row per application, newest first. Status is a colored badge (see visual guide).
- 5

View opens Details. Edit opens the form. Delete opens the confirmation screen.
- Empty list and "no results" messages are on page 9. Phone layout is on page 8.

Applied ▾

Notes

Contacts, interview dates, follow-up reminders...

5

Save

Cancel

NOTES

- 1 Required: Company, Position, Application date, Work model and Status (marked *).
- 2 Location, URL and Notes are optional. URL must be a valid link if entered.
- 3 Work model: Remote, Hybrid or On-site (radio buttons).
- 4 Status options: Applied, Interview, Offer, Rejected. Starts as "Applied"; date starts as today.
- 5 Save goes back to the list. Cancel goes back without saving.

Error messages under each field are shown on page 9. Edit (page 6) reuses this same form.

Interview

Notes

Phone screen went well. Technical round next week.

3

Save changes

Cancel

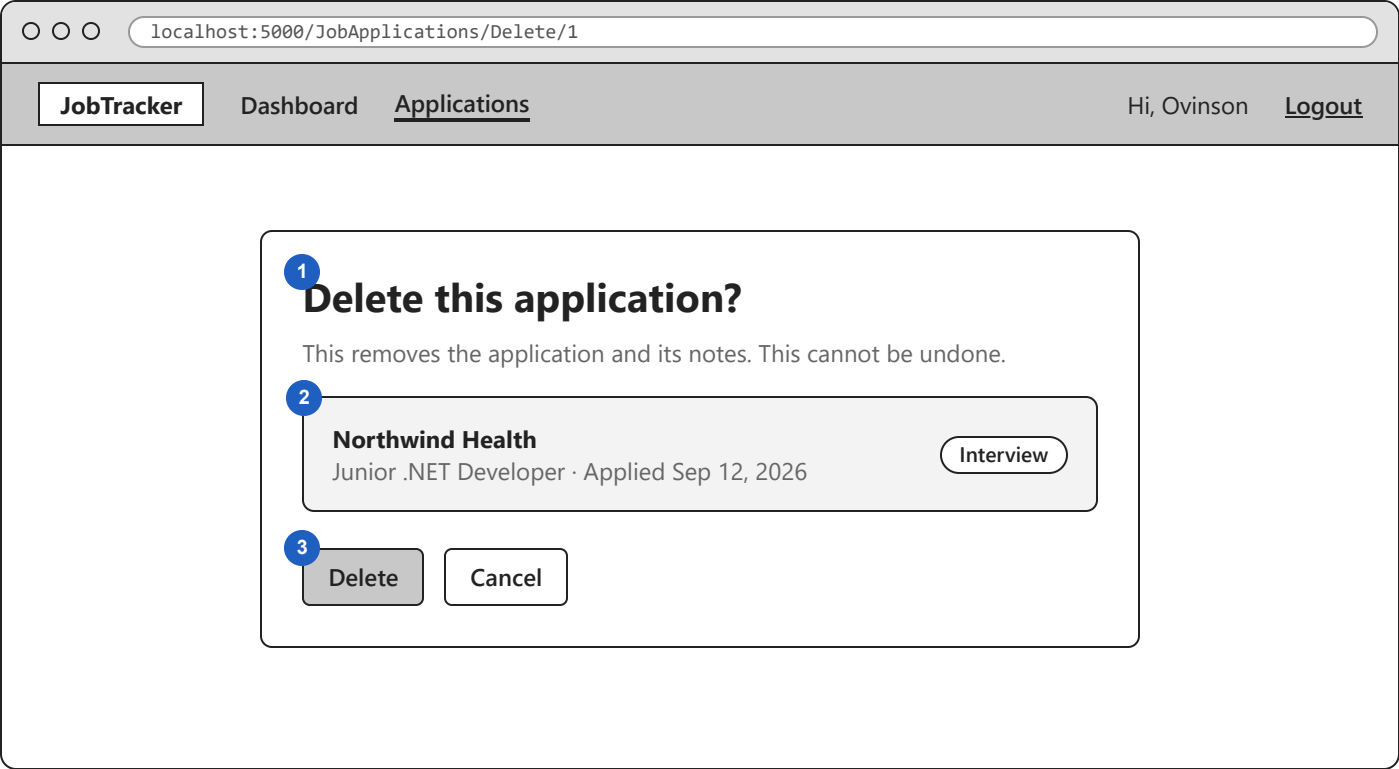

NOTES

- 1 Same form as Create, with the saved values already filled in.
- 2 Most common edit: changing the Status as the hiring process moves forward.
- 3 Save changes returns to the list (or Details). Cancel discards changes.

Time saver: build the fields once in a shared partial view (_Form.cshtml) and use it for both Create and Edit.

Delete confirmation

GET + POST /JobApplications/Delete/{id} · Views/JobApplications/Delete.cshtml

NOTES

- 1 A separate screen, so nothing is deleted by accident.
- 2 Shows which application is about to be deleted.
- 3 Delete removes it and returns to the list with a message. Cancel goes back without deleting.

The Delete button submits a POST form (not a plain link). Use the danger color from the visual guide.

Notes

Save

Cancel

NOTES

- 1 Navigation collapses into a menu button (Bootstrap navbar toggler).
- 2 Add button stays at the top of the list.
- 3 Search and filter stack full width.
- 4 The table becomes one card per application: company, title, date, status.
- 5 Form fields stack in a single column.
- 6 Save and Cancel are full-width buttons that are easy to tap.

Both layouts come from Bootstrap classes (container, row/col-md-6, table-responsive or cards). No custom media queries needed to start.

Empty list and validation states SPRINT 1

Shown when the list has no data, or the form has errors

9 / 11

The wireframe shows a web browser window with the URL 'localhost:5000/JobApplications'. The navigation bar includes 'JobTracker', 'Dashboard', and 'Applications' (active), along with user info 'Hi, Ovinson' and a 'Logout' link. The main heading is 'Applications' with a '+ Add application' button. The central area is a dashed box containing a large 'X' icon, the text 'No applications yet', a subtext 'Add the first job you applied to or want to save. Your applications will show up here.', and a button 'Add your first application'. At the bottom, a search bar contains the text 'When a search finds nothing: "No applications match your search." + Clear'.

EMPTY LIST

- 1 Explains what the page is for and gives one clear action: Add your first application.
- 2 A different message appears when a search or filter returns nothing.

The wireframe shows a web browser window with the URL 'localhost:5000/JobApplications/Create'. The navigation bar is identical to the previous page. The main heading is 'Add application'. A red-bordered box at the top contains the message 'Please fix the following:' followed by a bulleted list of errors: 'Enter the company name.', 'Enter the position.', and 'Enter a valid link (starts with http:// or https://)'. Below this, the form fields are: 'Company *' (empty), 'Position *' (empty), 'Job posting URL' (containing 'www.example'), 'Location' (containing 'City, State'), and 'Application date *' (containing '09/20/2026'). Each field has a red error message below it: 'Enter the company name.', 'Enter the position.', 'Enter a valid link (starts with http:// or https://).', and 'Enter a valid link (starts with http:// or https://)'. At the bottom are 'Save' and 'Cancel' buttons.

VALIDATION

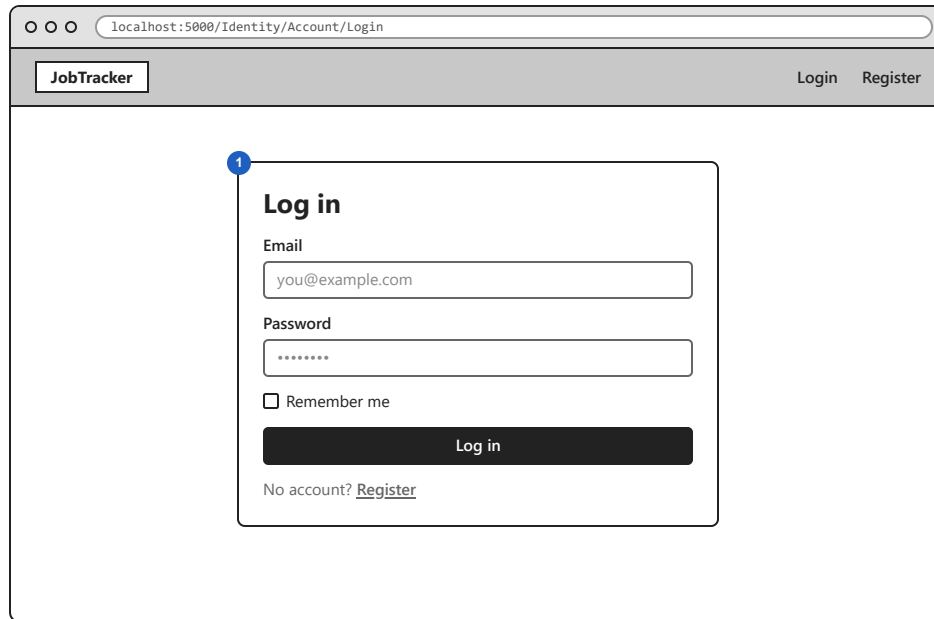

- 1 Errors appear in a summary at the top and under each field, in red.
- 2 What the user typed stays in the form so nothing is lost.

Login and Register

LATER SPRINT

Account pages (ASP.NET Core Identity) · not part of the Sprint 1 tasks

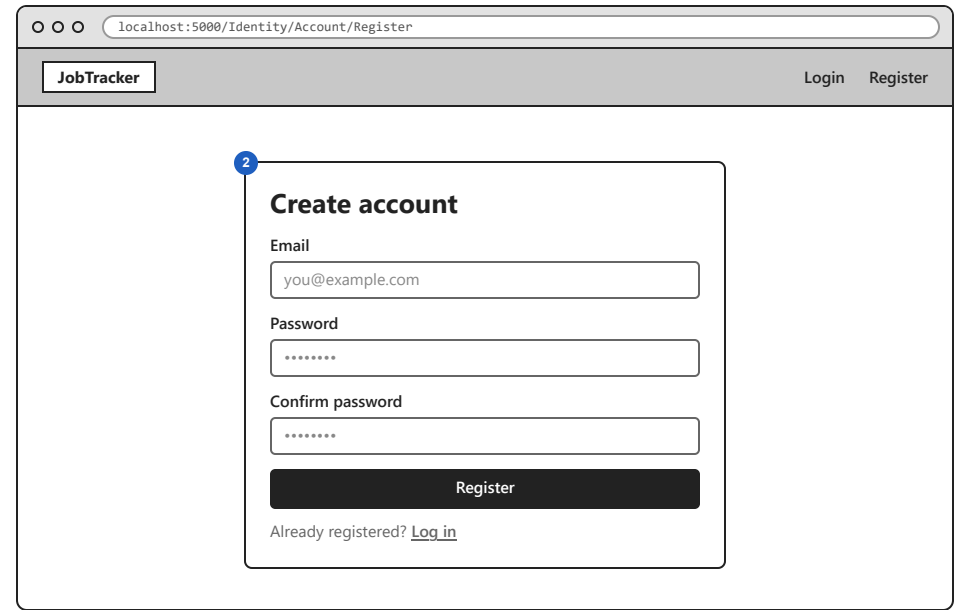

10 / 11

The wireframe shows a web browser window with the address bar displaying 'localhost:5000/Identity/Account/Login'. The page has a header with 'JobTracker' on the left and 'Login Register' on the right. The main content area features a 'Log in' form, indicated by a blue circle with the number '1'. The form includes an 'Email' field with the placeholder 'you@example.com', a 'Password' field with masked characters, a 'Remember me' checkbox, a 'Log in' button, and a link to 'Register' for users without an account.

NOTES

- 1 Log in: email + password. After login the user lands on the Dashboard.
- 2 Register: creates the account, then logs the user in. Logout is a link in the top navigation once signed in.

The wireframe shows a web browser window with the address bar displaying 'localhost:5000/Identity/Account/Register'. The page has a header with 'JobTracker' on the left and 'Login Register' on the right. The main content area features a 'Create account' form, indicated by a blue circle with the number '2'. The form includes an 'Email' field with the placeholder 'you@example.com', a 'Password' field with masked characters, a 'Confirm password' field with masked characters, a 'Register' button, and a link to 'Log in' for already registered users.

SCOPE

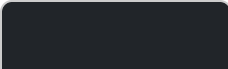

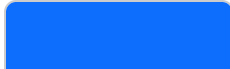

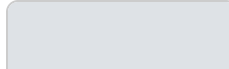

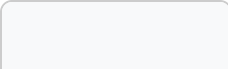

Login is in the project feature list, but the Sprint 1 assignment does not include it. ASP.NET Core Identity generates these pages, so the team only needs to restyle them with the shared layout.

Visual guide SPRINT 1

Starting point: Bootstrap 5 defaults, so almost nothing needs custom CSS
